Sir:

Pursuant to 37 C.F.R. §1.97 and § 1.98 and MPEP 2001.06(c), applicant submits for consideration in the above-identified application the following disclosure. All of the documents identified below are believed to be of record already. If an additional copy of any document is required, the Examiner is invited to contact applicant.

These documents were cited by defendants in the matter of ACTV, Inc. and HyperTV Networks Inc. v. The Walt Disney Co., ABC, Inc. and ESPN, Inc in U.S. District Court for the Southern District of New York (Civil Action No. 00 Civ. 9622 JSR) as relevant to the validity of one or more claims in U.S. Patent Nos. 5,778,181 (Ser. No. 615,143), 5,774,664 (Ser. No. 622,474) and 6,018,768 (U.S. Ser. No. 09/109,945). Applicant would appreciate the Examiner initialing and returning the Form PTO/SB/08a/b, indicating that the information has been considered and made of record herein.

In the above-referenced legal proceeding, defendants also alleged inequitable conduct in the prosecution of the '181, '664 and '768 patents. The '768 patent is a continuation-in-part of the '181 patent and is related to the '664 patent.

- a) Defendants alleged intentional failure to disclose U.S. Patent No. 5,479,268 to Young et al. in prosecution of the above-referenced patents. Patent-owner showed that the '268 patent is cumulative with U.S. Patent No. 5,589,892 to Knee et al. which was cited by the Examiner during prosecution of the '181 patent. Patent-owner also showed that the same examiner responsible for examining the '181, '664 and '768 patents issued a search report in a PCT application claiming priority to the '181 and '664 patents in which the '268 was cited as being of "particular relevance."
- b) Defendants alleged misrepresentation in the "Summary of the Invention" sections of the above-referenced patents of the prior art Intericast system as a one-way analog instead of a two-way digital system. Patent-owner showed that the Intericast product literature distinguishes the Intericast system from two-way systems and that each of the three co-inventors of the Intericast system testified in depositions that the Intericast system is a one-way analog system.
- c) Defendants alleged intentional failure to disclose that the subject matter of claims 19 and 20 of the '768 patent was on sale as of July 6, 1997, more than one year prior to its filing. Patent-owner showed that the Examiner found that claim 19 was fully supported by earlier disclosures including application Serial No. 613,144, filed on March 8, 1996, and in the application that matured into the '181 patent. Patent-owner showed that the subject matter of claim 20 was not complete and ready for patenting before July 7, 1997 and that the claims of the '768 patent were supported by the '181 patent.

- d) Defendants alleged intentional failure to disclose U.S. Patent No. 5,761,606 to Wolzien in prosecution of the '768 patent. Patent-owner showed that the '606 patent was cited by the Examiner during prosecution of the application that issued as the '768 patent.
- e) Defendants alleged intentional failure to disclose U.S. Patent No. 5,818,441 to Throckmorton et al. in prosecution of the '768 patent. Patent-owner showed that there was no evidence that the inventors or the prosecuting attorney had reviewed the '441 patent until after the '768 patent had already issued. Patent-owner also showed that the '441 patent was cumulative with the Intercast system and the '606 patent to Wolzien.
- f) Defendants alleged intentional misrepresentation in prosecution of the '768 patent by the assertion that ACTV had a one hundred percent ownership interest in the '181 and '664 patents. Patent-owner showed that the assignments made in the '181 and '664 patents reflect that the inventors of the '181 and '664 patents had sold, assigned and transferred their entire right, title and interest in those patents to ACTV.

The above-referenced case was settled and no decision on the merits was reached with respect to these contentions. The relevant pleadings were filed under seal pursuant to a protective order and are not publicly available. Applicant asserts that the above description of the allegations made and responses plead is accurate and complete.

The information contained in this Supplemental Information Disclosure Statement under 37 C.F.R. § 1.97 and § 1.98 is not to be construed as a representation that: (i) a complete search has been made; (ii) additional information material to the examination of this application does not exist; (iii) the information, protocols, results and the like reported by third parties are accurate or enabling; (iv) the above information constitutes prior art to the subject invention; (v) applicant admits to the inequitable conduct allegations in whole or in part.

In the unlikely event that the transmittal form is separated from this document and the Patent Office determines that an extension and/or other relief (such as payment of a fee under 37 C.F.R. §

Application No: 10/761,351

Atty. Docket No. 559442600207

1.17 (p)) is required, applicant petitions for any required relief including extensions of time and authorizes the Commissioner to charge the cost of such petitions and/or other fees due in connection with the filing of this document to Deposit Account No. 03-1952 referencing 559442600207.
